

M. Sc. Applied Psychology

Syllabus

UNIVERSITY DEPARTMENT

Program Code: PSYB

2021 – 2022 onwards

BHARATHIAR UNIVERSITY

(A State University, Accredited with “A” Grade by NAAC,
Ranked 13th among Indian Universities by MHRD-NIRF,
World Ranking: Times -801-1000, Shanghai -901-1000, URAP - 982)

Coimbatore - 641 046, Tamil Nadu, India

Program Educational Objectives (PEOs)	
The M. Sc. Applied Psychology program describe accomplishments that graduates are expected to attain within five to seven years after graduation	
PEO1	To prepare students to excel in Post graduate Programs and to succeed in the field of counselling and HR through global, rigorous education.
PEO2	To provide students with a solid foundation in psychology and help them in gaining skills in the various areas of psychology and also to pursue higher studies.
PEO3	To provide students with the foundation in skill development required to design, develop intervention strategies for behavior change
PEO4	To inculcate in students professional and ethical attitude, effective communication skills, teamwork skills, multidisciplinary approach, and an ability to relate psychological issues to broader social context, additional courses with regard to physical, psychological and career growth.
PEO5	To provide the student with an academic environment aware of excellence, outstanding leadership, written ethical codes and guidelines with moral values, and the life-long learning needed for a successful career.

Program Specific Outcomes (PSOs)	
After the successful completion of Psychology program, the students are expected to	
PSO1	Understand the fields of Psychology and the research specific areas
PSO2	Understand the principles of psychology and its application in various fields
PSO3	Learn the concepts which form a catalyst to behavior
PSO4	Developing methods to write case analysis and assessment using psychological tests/instruments
PSO5	Learn to relate human behavior at work and develop intervention techniques problems encountered at work place.

Program Outcomes (POs)	
On successful completion of the M. Sc. Applied Psychology program	
PO1	Apply knowledge of psychology to help humans in society to find solution to their problems and improve quality of life.
PO2	Identify, formulate, review literature and analyze human potentials and design programs for enhancing human behavior.
PO3	Design solution for human problems with appropriate consideration for the public health and safety, and the cultural, societal and the environmental considerations.
PO4	Use research based knowledge and research methods including design of experiments, analysis and interpretation of data, in psychological research
PO5	Understand the impact of Psychology in societal and environmental contexts, and demonstrate the knowledge and need for sustainable development

BHARATHIAR UNIVERSITY, COIMBATORE 641 046

M. Sc. Applied Psychology (UD) CBCS PATTERN (University Department)

(For the students admitted during the academic year 2021 – 22 onwards)

Course Code	Title of the Course	Credits	Hours		Maximum Marks		
			Theory	Practical	CIA	ESE	Total
FIRST SEMESTER							
17PSYBC01	Research Methodology and Statics	4	4		50	50	100
17PSYBC02	Elements of Health Psychology	4	4		50	50	100
17PSYBC03	Organizational Behavior	4	4		50	50	100

	Total	26	22	4	312	338	650
FOURTH SEMESTER							
	Project work/ Clinical/Industrial Practicum	8				200	200
	Total	8					

Grand Total		100	70	12	986	1264	2350
ONLINE COURSES							
	SWAYAM – MOOC – Online Course*	2					50
		Non-scholastic with Credits					
VALUE ADDED COURSES							
	Life Span Psychology	4					50
JOB ORIENTED COURSES							
	Behavior Modification	4					50

*SWAYAM – MOOC – online course shall be of duration at least 4 weeks with at least 2 credits. The course shall be mandatory and shall be completed within third semester (i.e., before the beginning of fourth semester).

NOTE: The entries in the template are only for illustrative purpose. Titles of the courses (core / elective / practical) in the second column may be entered according to the programme.

First Semester

Course code	17PSYBC01	RESEARCH METHODOLOGY AND STATISTICS	L	T	P	C
Core			4	-	-	4
Pre-requisite		Basic in Research in Psychology	Syllabus Version		2021-22	
Course Objectives:						
The main objectives of this course are to:						
1. To enable students to understand the basics of research .						
2. To help students analyse and identify the variables and hypotheses used in the research.						
3. To enable students to understand the non-experimental methods in research.						
4. To understand the concepts of experimental research methods.						
5. To help students develop skills required for analysing the data and writing in research.						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	To enable the understanding of the research methodology and ethics in research					K1
2	To understand the variables, measurement and hypotheses testing in research					K2
3	To familiarize with observational and survey research approaches.					K3
4	To enhance the knowledge on single factor design and factorial design.					K4
5	To familiarize the quantitative and qualitative analysis of data and writing in research.					K4
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create						
Unit:1						
Basics of Research			12 hours			
Research Methodology: Meaning, Objectives, Types of Research, Significance of Research, Steps – Choosing a research question, Choosing a research method, planning the research and executing the research.						
Research Question: Choice of a Problem – The Literature Review –Use of Internet.						
Ethics in Research: APA Ethics Code – Responsibility, Protection from Harm, Informed Consent, Privacy and Freedom from Coercion, Deception, Debriefing, Role of Research Participant, Ethics in Scientific Writing.						
Unit:2						
Variables And Hypotheses			12 hours			
Variables: Types of Variables – Dependent and Independent Variables, Confounded Variables, Quantitative and Categorical Variables, Continuous and Discrete Variables						
Measurement: What is measurement? Types of Measurement Scales, Comparison of the Scales, Measurement and Statistics- Reliability and Validity of Measurements						
Hypotheses: Testing hypotheses, Dealing with uncertainty in hypothesis testing, Type I and Type II Errors, Alpha and Statistical Significance, Effect Size						
Unit:3						
Non-Experimental Methods			12 hours			
Observational Research: Naturalistic Observation, Participant Observation. Interviewing. Focus Groups. Diary and Narrative Methods.						
Survey Research: Designing a questionnaire, Administering the questionnaire, Sampling- Steps in Sampling Design, Types of samples, probability samples and random selection.						

Important guidelines for non-experimental designs.		
Unit:4	Experimental Methods	12 hours
Single-Factor Designs: True experiments; Factors, Levels, Conditions and Treatments, Within-Subjects Designs, Between-Subjects Designs, Some designs to avoid. Factorial Designs: Simple factorial Design, Main effects, Interactions, Within-Subjects, Between-Subjects and Mixed Designs, Some representative factorial designs.		
Unit:5	Analysis Of Data And Writing In Psychology	12 hours
Quantitative Analysis: Measures of Central Tendency, Measures of Dispersion, Measures of Asymmetry (Skewness), Measures of Relationship, Partial Correlation, Simple Regression, Student t-test, One way ANOVA, Two-way ANOVA, Reporting of Statistics in APA style Qualitative Analysis: Interpretative Phenomenological Analysis, Grounded Theory, Content Analysis Writing in Psychology: General guidelines, Avoiding Sexism and Ethnic Bias in Writing, The Parts of a Paper, Documenting your paper, Steps in Publication Process, Oral Presentations, Poster Presentations.		
Unit:6	Contemporary Issues	2 hours
Expert lectures, online seminars - webinars		
	Total Lecture hours	62 hours
Text Book(s)

Course code	17PSYBC02	ELEMENTS OF HEALTH PSYCHOLOGY	L	T	P	C
Core			4	-	-	4
Pre-requisite	Basics in Psychology	Syllabus Version	2021 – 2022			
Course Objectives:						
The main objectives of this course are to:						
1. To teach the field and factors influencing health psychology						
2. To understand the type of personality and psychological approaches to health						
3. To evaluate how people live with illness, why they find changing behavior difficult and what psychologist can do to help with chronic illness.						
4. To understand the factors influencing health						
5. To describe the psychological approaches to health						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	Understand the biological, behavioural, cognitive and social determinants of health, and risk factors for health-compromising behaviours.					K2
2	Demonstrate advanced approaches to health and psychological approaches to health.					K4
3	Evaluate the research in health psychology and apply this knowledge in health-care profession.					K5
4	Create the healthy relationship and to understand health compromising behaviors.					K6
5	Apply the principles of stress and coping strategies.					K3
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 – Create						
Unit:1	The Field of Health Psychology and Factors Influencing Health				12 hours	
The Field of Health Psychology Definition and Focuses of Health Psychology - Health - Health Psychology - Wellness - Homeostasis - Historical perspectives on Health and Healing - Dimensions of Health and Wellness - Emotional, Intellectual, Spiritual, Occupational, Social and Physical - Models of Health: Medical, Environmental, Holistic - Bio-psycho-social and Bio-medical Model.						
Factors Influencing Health Mind and Body Relationship - Genetic - Environmental and Behavioral Factors - Health Habits - Primary Prevention - The Changing Health Behaviors: Demographic Factors - Age - Values - Health Locus Control - Social Influence - Personal Goals - Perceived Symptoms - Access to the Health care Delivery System - Cognitive Factors - Instability of Health Behavior - Socialization - Teachable Movement - Window of Vulnerability - Attitude Change and Self Efficacy on Health Behaviors.						
Unit:2	General Approaches to Health and Psychological Approaches to Health				12 hours	
General Approaches to Health Models and Theories of Health - The Health Belief Model - The Stages of Change Model - The Precaution Adoption Process Model (PAPM) - Theory of Planned Behavior (TPB) - Theory of Reasoned Action (TRA) - The Social Cognitive Learning Theory.						
Psychological Approaches to Health Psycho Dynamic - Behavioral - Big Five Personality Traits - Type A, B, C, and D Personality Factors - Hostility - Impulsivity - Self-Efficacy -						

Attitude Change - Motivational Cues for Health.		
Unit:3	Health Enhancing Behaviors, Eating Behavior and Health and Maintaining Healthy Weight	12 hours
Health Enhancing Behaviors Meaning Definition and Benefits of Exercise - Types of Exercise - Choosing the Right Exercise - Bio-psycho-social Perspective - Biological, Psychological and Socio-cultural factors on inactivity - Factors promoting Exercise Behavior.		
Eating Behavior and Health Meaning and Definition of Food - Functions of Food - The Seven Components of Food - Dietary Supplements - 2000 Calorie Food Pattern - The Healthy Eating Pyramid - Healthy Eating Behavior - Healthy Body Size.		
Maintaining Healthy Weight Meaning and Definition of Healthy Weight - Obesity - Body Mass Index - Energy Balance - Popular Weight loss Program - Sensible Weight Management - Dieting and Eating Disorders: Yo-Yo Dieting, Crash Diets and Fad Diets - Obesity - Anorexia nervosa and Bulimia nervosa - Weight Management Programs.		
Unit:4	Healthy Relationships and Health Compromising Behaviors	12 hours
Healthy Relationships Sexuality - Physical and Psychological Dimensions of Sexuality - Sexual Orientations - The Relationships Dimension of Sexuality: The Life-Cycle of Intimate Relationships - Developing Intimacy - Establishing Commitment - Endings in Relationship - Communicating in Intimate Relationships - Sending clear Messages - Effective Listening - Expressing Anger Constructively.		
Health Compromising Behaviors Smoking - Tobacco and Its Biological and Psychological Effect - Smokeless Tobacco - Tobacco Related Damage to Health - Effects of Parental Smoking on Children - Lung Cancer - Heart Disease and Bronchitis - Tobacco's Effects on Non Smokers - Reasons for Smoking - Quitting Smoking and Related therapies - Alcohol Alcoholism and Problem Drinking - The Phases of Alcoholism - Biological Psychological and Social effects of Alcohol Use and Abuse - Interventions for Alcoholism		
Unit:5	Stress and Coping, Heart Disease and Health	12 hours
Stress and Coping Stress - Stressors - Physiological and the Psychological Reactions to Stress - Theories of Stress by Walter Cannon and Hans Selye - Coping with Stress - Problem Focused, and Emotional Focused - Stress Management Techniques - Progressive Muscle Relaxation - Massage therapy - Self-help and Professional help - Religious and Spiritual Orientations - Stress Inoculation Training - Biofeedback - Redefinition and Guided Imagery.		
Heart Disease and Health Understanding of Cardiovascular Disease - Biological and Psychosocial Risk factors for Cardiovascular Disease - Diet and Cardiovascular Disease - Primary, Secondary and Tertiary Prevention and Control of Cardiovascular Disease.		
Unit:6	Contemporary Issues	2 hours
Expert lectures, online seminars – webinars		
	Total Lecture hours	62 hours

Course code	17PSYBC03	ORGANIZATIONAL BEHAVIOR	L	T	P	C
Core			4			4
Pre-requisite		Basics In Organization Psychology	Syllabus Version		2021-22	
Course Objectives:						
The main objectives of this course are to:						
1. To understand the nature of organizational behaviour						
2. To explain the individual behaviour related to motivation and rewards through models						
3. To identify the processes used in developing communication and resolving conflicts						
4. To explain group dynamics and demonstrate skills required for working in groups						
5. To discuss the implementation of organizational change						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	To analyze the psychological principles influence behavior in the workplace.					K4
2	Evaluate individual behavior in the workplace as influenced by personality, values, perceptions, and motivations					K5
3	Understand the management style as it relates to influencing and managing behavior in work settings					K2
4	Create modules to enhance group dynamics, communication, leadership					K6
5	Apply relevant contemporary theories, concepts and models to analyze real life management situations.					K3
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create						
Unit:1						
Need and Importance of Organizational Behaviour		12 hours				
Definition, Need and Importance of Organizational Behaviour - Nature and Scope -Management Roles - Management functions - Management Skills - Challenges and Opportunities for Organizational Behaviour - Contributing Disciplines to the Organizational Behaviour - Organizational Behaviour Models						
Unit:2						
Foundations of Individual Behaviour		12 hours				
Perception: Person Perception - Shortcuts in Judging Others-Interpersonal Perception- Its applications.						
Attitudes: Sources of Attitudes and its applications.						
Personality - Personality Determinants - Dimensions of Self Concept - Personality Traits - Matching Personality and Jobs types - Traits relevant to Work Behaviour						
Unit:3						
Learning, Motivation and Job Satisfaction		12 hours				
Learning: Theories of Learning - Shaping-Schedules of Reinforcement - Its Organizational Applications.						
Basic Motivation Concepts: Theories of Motivation - Content Theories: Maslow, Herzberg, Alderfer, McGregor, McClelland, Process Theories: Vroom, Porter and Lawler's Expectancy Model, Adams Equity Model, Skinners Reinforcement Model, Goal Setting Theory - Applications of Motivation Theory MBO - Employee recognition and involvement program						
Unit:4						
Foundations of Group Behaviour		12 hours				
Types of Groups - Models of Group Development- External Conditions Imposed on the Group - Group Structure - Group Process - Group Decision Making Group Think and Group Shift -						

Inter group Relations - Methods for Managing Inter-group Relations Types of Teams - Models of Team Effectiveness - A developmental Model - A Systems Model Team Building. Conflict Process: Types of Conflicts - Conflict management Techniques - Functional and Dysfunctional Outcomes of Conflict		
Unit:5	Dynamics of Organizational Behaviour	12 hours
Communication Process - Barriers to Effective Communication - Directions of Communications - Non-verbal Communications Leadership Theories: Personality Trait Theories - Behavioral Styles - Situational and Contingency Style - Transformational Leadership - Sources of Power Change Process: Forces for Change - Resistance to Change - Overcoming Resistance to Change - Approaches to Management Organizational Change- Implementing Successful Change- Organizational Development Intervention Strategies		
Unit:6	Contemporary Issues	2 hours
Expert lectures, online seminars – webinars		
	Total Lecture hours	62 hours

Course code	17PSYBC04	COGNITIVE PSYCHOLOGY	L	T	P	C
Core			4	-	-	4
Pre-requisite		Basics In Psychology	Syllabus Version	2021-2022		
Course Objectives:						
The main objectives of this course are to:						
1. Understand the mental processes and their relationship to Brain, Mind and behavior.						
2. Recognize the higher mental processes and its relevance in daily living.						
3. Relate the concepts of language and problem solving and creativity in everyday life						
4. Understand memory structure and process and its relation to neurocognition						
5. Understand the Neurophysiological sensing techniques and their applications						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	Remember the theoretical approaches of cognitive neurosciences.					K1
2	Apply the various concepts of attention and memory.					K3
3	Describe the process, acquisition of language and development.					K1
4	Analyze the aspects of problem solving and decision making.					K5
5	Assess the structures, approaches of intelligence and strategies to improve intelligence					K6
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create						
Unit:1						
The Nature, History and Cognitive Neuroscience		12 hours				
What is Cognitive Psychology? - Cognitive Psychology: Definition and domains-Roots of Cognitive Psychology – Conceptual Science and Cognitive Psychology. Cognitive Neuroscience: Cognitive Psychology and Neuroscience, the Nervous System - the Neuron - the brain - Anatomy of the Brain, Neurophysiologic Sensing Techniques – MRI – EPI – CAT scan – PET scan, a tale to hemispheres - Cognitive Psychology and Brain Science - Application: Cognitive style and cognitive map.						
Unit:2						
Perception, Attention, Patter Recognition and Consciousness		12 hours				
Introduction: Perception and Attention - Sensation and Perception - Perceptual Span - Iconic Storage - Echoic Storage - Functions of sensory stores - Attention - Processing capacity and selective attention - Auditory signals - Models of selective attention- Visual attention- Automatic processing- The neuro-cognition of attention - Human Brain and Attention - PET. Pattern Recognition: Perceptual theories: Template-matching theory - Feature detection theory - Independent confirmation of feature analysis - Gestalt theory -Canonic perspectives - Prototype matching, Pattern recognition - The role of the perceiver. Application: of (feature analysis, template matching, prototypes) in Bottom-Up Top-Down and Pandemonium in visual processing Consciousness:Explicit and implicit memory - Research with primes - Neuro Cognitive studies - Sleep and Amnesia - Modern theories of consciousness - Baars’ global workspace theory - Functions of consciousness.						
Unit:3						
Memory Structure and Process		12 hours				
Short term memory – Neuro-cognition and STM - working memory - Capacity of STM - The coding of Information in STM - Retrieval of Information from STM - Long term memory:Neuro-cognition and LTM - LTMSStorage and structure - Very long - Term Memory - Autobiographical						

Memories - Fallibility of Memory and Eyewitness Identification. Theories and Neuro-cognition: Neuro-cognition of Memory - Two Memory Stores - Models of Memory - levels of Processing - Self-Reference Effect - Episodic and Semantic Memory Rumelhart - Tulving – McClelland. Mnemonics and Experts: Mnemonic System – Experts and Expertise		
Unit:4	Mental Representations: Memory and Imagery	12 hours
The Representation of Knowledge: Semantic organization - Associationist approach Semantic memory model - Set theoretical model - Semantic feature - Comparison model - Network model - Propositional model networks. Representation of Knowledge - Neuro-cognitive consideration - Connectionism and the Representation of Knowledge. Mental Imagery: Imagery and Cognitive Psychology - Neuro-cognitive Evidence - Cognitive Maps Storing - Retrieving –Retrieval from working and permanent memory - Theories of retrieval -Forgetting. Cognitive development:life-span development – Developmental Psychology – Neurocognitive Development – Comparative Development – Cognitive Development- Assimilation and Accommodation: Piaget – Mind in Society: Vygotsky – Vygotsky and Piaget. Early Neural Development – Environment and Neural Development – Intelligence and ability – Development of Information Acquisition Skills- Higher-Order Cognition in Children – Prototype Formation among Children.		
Unit:5	Thinking, Problem Solving, Creativity and Decision Making	12 hours
Thinking - Concept formation – Logic – Decision Making - Problem solving – Gestalt Heritage – Problem solving approaches – Algorithm - Heuristics - Definition of creativity – Process – Barriers on creativity – Human intelligence – Artificial Intelligence – AI and PDP – Machines and Mind – Perception and Artificial Intelligence – Language and Artificial Intelligence.		
Unit:6	Contemporary Issues	2 hours
Expert lectures, online seminars - webinars		
	Total Lecture hours	62 hours

Course code	17PSYBC05	EXPERIMENTAL PSYCHOLOGY - I	L	T	P	C
Core			-	-	4	4
Pre-requisite		Basics in Psychology	Syllabus Version		2021-22	
Course Objectives:						
The main objective of this course are to:						
1. To realize the importance and utility of the methodology and statistics in psychology.						
2. To learn the strategy to interpret the results of the factors/variables						
3. To draw a meaningful conclusion based on the assessment results and data						
4. To write a clear cogent summaries and interpretations.						
5. To enhance skills to conduct psychological test						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	To apply an appropriate statistical analysis for the data					K3
2	To evaluate the various factors associated with health and well-being					K5
3	To understand the psychological factors related to organization					K2
4	To evaluate the performance and quality of the employee					K5
5	To analyze the individual cognitive skills					K4
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create						
Unit:1						
		Research Methodology and Statistics	12 hours			
1. Survey Research						
2. Experimental Research						
3. Computing a t test						
4. Computing correlation						
5. Computing regression						
6. Computing ANOVA						
Unit:2						
		Health Psychology	12 hours			
1.Stress Assessment Questionnaire						
2.Quality of Life Index Questionnaire						
3.Subjective Well Being Questionnaire						
4.General Health Questionnaire						
5.Student's Alcohol Syndrome Questionnaire						
Unit:3						
		Organizational Behaviour	12 hours			
1.Conflict Management Styles						
2. Need Hierarchy - Motivation Questionnaire						
3.Power Orientation Questionnaire – Identification of Power Bases						
4.Leadership Style Questionnaire – Managerial Grid						
5. McGregor's Theory X and Y Questionnaire						
Unit:4						
		Cognitive Psychology	12hours			

1.Laterality – left and right hemisphere specialization		
2.Stroop Effect		
3.Decision Making Exercise		
4.Short term and Long Term Exercises		
5. Cognitive Style Questionnaire		
<ul style="list-style-type: none">• This list is suggestive• A minimum of 12 experiments/exercises must be completed

Course code	17PSYBC06	ESSENTIALS OF SOCIAL PSYCHOLOGY	L	T	P	C
Core			4			4
Pre-requisite		Basics in Psychology	Syllabus Version		2021-22	
Course Objectives:						
The main objectives of this course are to:						
1. To understand the theories, concepts, perspectives in social psychology.						
2. To explain how theories used to describe human attitude and behaviour.						
3. Analysis the nature of human diversity and attitudes toward diversity						
4. Recognize the factors that influence the individuals in patterns of social behavior						
5. Understand the dynamics of intergroup relationships, conflict, and cooperation						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	To understand the key substantive content of the field of social psychology					K2
2	Use existing knowledge and concepts to identify the causes of the social behavior					K3
3	Develop the abilities to analysis regarding the principles of social behaviour					K4
4	Able to evaluate empirical findingsto explain, predict, and influence behavior.					K5
5	Remember the ethics in social psychology research					K1
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create						
Unit:1						
Genesis and Focus of Social Psychology		12 hours				
Origin and Development of Social Psychology - Modern Trends in Social Psychology - Cognitive - Multicultural - Evolutionary - Neuroscience - Implicit processes and Social Diversity. Social Perception - Non-Verbal Communication - Basic Channels - Gazes and Stares - Body Language and Touching - Recognizing Deception - Individual Differences. Attribution: Meaning - Theories - Jones and Davis Theory - George Kelly's Theory - Weiner's Theory - Impression Formation and Impression Management. Social Cognition - Definition - Schemas and Prototypes - Heuristics - Types of Heuristics - Errors in Social cognition: Negativity bias - Optimistic bias - Counterfactual thinking - Thought suppression - Limits on Abilities.						
Unit:2						
Attitude and Self		12 hours				
Attitudes and Human Behavior Nature and Functions of Attitudes - Formation of Attitudes: Social Learning - Direct Experiences and Genetic Factors - Attitudes Influence Behavior - Persuasion - Process of Changing Attitudes - Traditional and Cognitive approaches - Other factors affecting Persuasion - Resistance to Changing Attitudes - Reactance - Forewarning - Selective avoidance - Actively defending and Inoculation - Cognitive dissonance. The Aspects of Self Identity Definition - Possible Self - Self Concepts - Self-awareness - Self-Esteem - Self Focusing - Self Monitoring - Self Efficacy - Self Presentation - Self Regulation - Gender Identity - Gender Consistency - Sex Typing and Psychology of Androgyny						
Unit:3						
Prejudice and Interpersonal Attraction		12 hours				
Prejudice and Discrimination Definition - Nature and Origin of Prejudice - Direct Intergroup Conflict - Early Experiences - Social Categorization - Cognitive sources of Prejudice - Modern Racism - Priming - Discrimination: Bonafide pipeline and Exposure Techniques for Minimizing Prejudice: Learning Not to Hate - Direct Intergroup Contact - Re-Categorization - Cognitive						

Interventions. Interpersonal Attraction Definition and Nature of Interpersonal Attraction - Internal Determinants of Attraction: The Need to Affiliates - The Basic Role of Affect - External Determinants of Attraction: The Power of Proximity and Observable Characteristics - Interactive Determinants of Attraction: Similarity - Complementarities and Mutual Liking - Interdependent Relationships: Close Relatives - Friendships - Loneliness - Romantic Relationships - Theories of Love - Marital Relationships - Success and Failure of Marriage.		
Unit:4	Social Influence and Pro-social behaviour	12 hours
Social Influence Definition - Conformity - Classical Conformity Studies: Sherif's - Asch's and Milgram's studies on conformity - The Factors Affecting Conformity: Cohesiveness - Group Size - Type of Social Norm - Bases of Conformity - Need for Individual - Minority Influence. Compliance: Ingratiation - Foot in the Door and The Low ball - The Door in the Face and That is Not All - Fast Approaching and Deadline Technique - Scarcity - Obedience to Authority. Pro-Social Behavior Definition - Basic Concepts - Empathy - Altruism - Reasons for Helping - Empathy Altruism Hypotheses - Negative State Relief Model - Empathic Joy Hypotheses and Genetic Determinism - Responding to an Emergency - Bystander Effect - Diffusion of Responsibility - Heroism - Five Steps in Helping Vs Not Helping - External and Internal Influences on Helping Behavior: Situational Factor - Emotional Personality Disposition - Altruistic Personality - Motives for Volunteering.		
Unit:5	Aggression, Group and Individual Behaviour	12 hours
Nature of Aggression Definition - Theories: Instinct - Biological - Drive - Social Learning and Cognitive - Personal Causes: Type A Behavior - Hostility - Irritability - Gender - Social Causes - Frustration - Direct Propagation - Exposes to Media Violence - Height End Arousal - Spiritual Arousal - Sexual Jealousy - Situational Causes - Child Maltreatment - Work place Violence - Bullying - Prevention and Control of Aggression - Punishment - Cognitive Interventions - Catharsis Training in Social Skills and Forgiveness. Groups and Individual Behavior Definition - Nature and Function of Groups - The benefits and Costs of Working with others - Social Facilitation - Social loafing - Deindividuation - Group Polarization - Groupthink - Individuals Influence on Group - Perceived Fairness in groups - Decision Making by Groups.		
Unit:6	Contemporary Issues	2 hours
Expert lectures, online seminars - webinars		
	Total Lecture hours	62 hours

Course code	17PSYBC07	PERSONALITY THEORIES AND APPLICATION	L	T	P	C
Core			4			4
Pre-requisite		Basics in Psychology	Syllabus Version		2021-22	
Course Objectives:						
The main objectives of this course are to:						
1. To enable students to understand the concept and assessment of personality.						
2. To help students to understand the dispositional domain and biological domain in personality.						
3. To understand the intrapsychic domain to personality.						
4. To enable students to familiarize with cognitive, social and cultural domains in personality.						
5. To enhance the understanding of eastern approaches to personality.						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	To enable the understanding of the levels of personality analysis and sources of personality data.					K1
2	To understand the trait and physiological approaches to personality.					K3
3	To familiarize the psychoanalytic approaches related to motives and personality.					K4
4	To enhance the knowledge on perception, interpretation- self, social and cultural aspects of personality.					K4
5	To familiarize with facets of personality and eastern approaches to personality.					K2
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create						
Unit:1	Personality: Concept And Assessment				12 hours	
Three levels of Personality Analysis – Human Nature, Individual and Group Differences, Individual Uniqueness. A fissure in the field – Grand theories of Personality, Contemporary Research in Personality. Six Domains of Knowledge about Human Nature: Dispositional Domain, Biological Domain, Intrapsychic Domain, Cognitive-Experiential Domain, Social and Cultural Domain, Adjustment Domain. The role of personality theory. Standards for evaluating personality theory						
Sources of Personality Data: Self-Report Data (S- Data), Observer-Report Data (O-Data), Test-Data (T-Data), Life-Outcome Data (L-Data). Issues in Personality Assessment. Evaluation of Personality Measures:Reliability, Validity, Generalizability. Research Design: Experimental Methods, Correlational Studies, Case Studies.						
Unit:2	Dispositional Domain And Biological Domain				12 hours	
What is a Trait? Two Basic Formulations. Identification of the Most Important Traits: Lexical Approach, Statistical Approach, Theoretical Approach. Taxonomies of Personality - Eysenck's Hierarchical Model of Personality, Cattell's Taxonomy: The 16 Personality Factor System, Five-Factor Model.						
Sheldon's Physiological Approach to Personality.Physiological Measures Commonly Used in Personality Research: Electrodermal Activity (Skin Conductance), Cardiovascular Activity, Brain Activity, Other Measures. Physiologically Based Dimensions of Personality: Extraversion-Introversion, Sensitivity to Reward and Punishment, Sensation Seeking, Neurotransmitters and Personality, Morningness-Eveningness, Brain Asymmetry and Affective Style.						
Unit:3	The Intrapsychic Domain				12 hours	

Psychoanalytic Approaches to Personality: Fundamental Assumptions of Psychoanalytic Theory. Sigmund Freud: Structure of Personality, Dynamics of Personality, Psychosexual Stages of Personality Development, Personality and Psychoanalysis. Carl Jung: Analytical Psychology. Alfred Adler: Individual Psychology.		
Psychoanalytic Approach – Contemporary Issues: The Neo-Analytic Movement, Ego Psychology, Object Relations Theory. Motives and Personality: Basic Concepts – Need and Press. Apperception and the TAT. The Big Three Motives – Achievement, Power, Intimacy. Humanistic Tradition: Maslow and Roger's Contribution.		
Unit:4	Cognitive/ Experiential Domain And Social And Cultural Domain	12 hours
Personality revealed through Perception- Field dependence. Personality revealed through Interpretation - Kelly's Personal Construct Theory, Locus of Control, Learned Helplessness. Personality revealed through Goals - Personal Projects Analysis - Life Tasks, Goals, and Strategies.		
Approaches to the Self: Descriptive Component of the Self-Self Concept. Evaluative Component of the Self- Self-Esteem. Social Component of the Self: Social Identity.		
Social Domain - Sex, Gender And Personality: Science and Politics of Studying Sex and Gender, Gender Differences in Personality, Masculinity, Femininity and Androgyny, and sex roles, Theories of Sex Differences. Cultural Domain – Cultural violation, Cultural Personality Psychology, Three Major Approaches to culture: Evoked Culture, Transmitted Culture, Cultural universal.		
Unit:5	Facets Of Personality And Eastern Approaches To Personality	12 hours
Skinner: Operant Conditioning. Albert Bandura: Observational Learning. Martin E. P. Seligman: Learned Helplessness and the Optimistic/ Pessimistic Explanatory Style.		
Yoga and the Hindu Tradition –Major concepts, Dynamics and Structure. Zen and the Buddhist Tradition – Major Concepts, Dynamics and Structure. Sufism and the Islamic Tradition – Major Concepts, Dynamics and Structure. Integral Psychology – Basic Concepts and Model of Being. Probabilistic Orientation – Basic Postulate and Seven Factors.		
Unit:6	Contemporary Issues	2 hours
Expert lectures, online seminars - webinars		
	Total Lecture hours	62 hours

Course code	17PSYBC08	HUMAN RESOURCE MANAGEMENT	L	T	P	C
Core			4			4
Pre-requisite	Basics in Human Relations		Syllabus Version		2021-22	
Course Objectives:						
The main objectives of this course are to:						
1. To enable students to understand the various concepts in HR management.						
2. To help students analyse, plan and identify the various approaches for the management of human resources.						
3. To enable students to understand the process of HR management.						
4. To understand the concepts of incentives, plans and benefits.						
5. To help students develop skills required for HR management at application level.						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	To enable the understanding of the concepts of HRM					K1
2	To understand the testing and selections process of Human Resources					K2
3	To familiarize with appraisal process; develop skills needed for training and career planning					K3
4	To enhance the knowledge on employee compensation; financial incentives, plans and benefits					K4
5	To familiarize recent trends and practices in managing human resources					K4
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create						
Unit:1	Key Human Resources Concepts				12 hours	
Strategic Role of Human Resources and the HR Scorecard: Nature of HRM, Scope of HRM, Systems Approach to HRM, Traditional HR vs. Strategic HR, HRM in the new Millennium HRM Human Resources Planning: Process of Human Resource Planning, Responsibility for HRP, Effective Human Resource Planning.						
Unit:2	Determining, Attracting And Selecting Human Resources				12 hours	
Job Analysis: Uses of Job Analysis, Process of Job Analysis, Methods of Collecting Job Analysis, Job Description, Job Specification, Role Analysis Job design and Quality of Work Life: Techniques for Designing Jobs Recruiting Human Resources: Sources of Recruitment, Methods of Recruitment, Recruitment – Indian Experiences Employee Testing and Selection: Types of Tests, Tests as Selection Tools Interviewing Candidates: Types of Interview, Interview Process, Reference Checks						
Unit:3	Developing Human Resources				12 hours	
Appraising and Managing Performance: Performance Appraisal Process, Methods of Performance Appraisal, 360 degree Feedback System, Problems with Performance Appraisal Training and Developing Employees: Need for Training, Systematic Approach to Training, Types of Training, Training Methods, Evaluation of Training Career and Succession Planning: Concept of Career, Career Stages, Career Planning, Career Development, Succession Planning						
Unit:4	Rewarding Human Resources				12 hours	
Employee Compensation,: Objectives of Compensation Planning, Compensation of Pay Structure, Factors Influencing Compensation Levels						

Financial Incentives and Employees Benefits and Services: Statutory and Non-statutory benefits, Incentive Plans, Individual Incentives, Group and Team Based Incentive Plans, Fringe Benefits, Establishing Strategic Pay plans		
Unit:5	Recent Trends And Practices In Managing Human Resources	12 hours
Participation and Empowerment: Forms of Participation, Alternative Approaches to Participation, Prospects of Empowerment International Human Resources Management: Pressures of Globalization, Cultural Differences and HRM, International Recruitment Policy, International Selection Criteria, International Training and Development, International Compensation.		
Unit:6	Contemporary Issues	2 hours
Expert lectures, online seminars - webinars

Course code	17PSYBC09	BIO PSYCHOLOGY	L	T	P	C
Core			4			4
Pre-requisite	Basics in Physiological Psychology	Syllabus Version	2021-22			
Course Objectives:						
The main objectives of this course are to:						
1. To explain the historical foundation and research methods in biopsychology.						
2. To discuss the brain, end the functions of the nervous system						
3. To understand the major endocrine glands and physiology behind sensory system.						
4. To teach the state of states of consciousness, motivation and emotion.						
5. To describe the physiology behind sensory systems						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	Understand the process of neurons send and receive signals, visualizing the living human brain					K2
2	Analyze the functional anatomy and organization of human brain					K4
3	Evaluate the mechanisms of hormone function and visual system					K5
4	Understand the physiology behind sensory systems					K2
5	Evaluate the neural mechanism of reward, punishment and emotion					K5
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create						
Unit:1	Introduction to Neuron and Nervous System				12 hours	
Bio Psychology- Historical Foundations- Neuron- Anatomy- functions- Synapse-Neural conduction and Synaptic Transmission Research Methods in Biopsychology- Methods of visualizing human brain- CT- MRI- PET- fMRI- Recording human psycho physiological activity- muscle tension- eye movement- skin conductance- cardiovascular activity- Invasive physiological research methods- stereotaxic surgery- lesion methods- electrical stimulation- Pharmacological methods.						
Unit:2	Brain and its functions				12 hours	
Nervous system- Classification- anatomy of ANS- functions of ANS- Reflex plan of the central Nervous System. Parts of Brain- Functions of the major parts of the brain- Functional anatomy of the cerebral cortex- supporting and nourishing tissues in the CNS Functional organization of the brain- neocortex-reticular and projection systems- limbic system- hypothalamus- Cerebral metabolism- CNS- circulation- Blood Brain- Barrier- neuro secretion.						
Unit:3	Endocrine Glands				12 hours	
Characteristics- Major endocrine gland-hormone characteristics- mechanisms of hormone functions- Physiology behind Vision and audition.						
Unit:4	Physiology behind sensory systems				12 hours	
Physiology behind Somatosensory system- touch and pain- chemical senses- Smell and taste- olfactory system- gustatory system.						

Unit:5	State of Consciousness, Motivation and Emotion	12 hours
States of Consciousness- physiological and psychological states- sleep and activation- attention and vigilance- meditation. Physiology behind Motivation- hypothalamic centers- regulation of thirst- hunger and sex drives - neural mechanism of reward and punishment - Neural mechanism in Emotion.		
Unit:6	Contemporary Issues	2 hours
Expert lectures, online seminars – webinars		
	Total Lecture hours	62 hours

Course code	17PSYBC10	PERSPECTIVES IN COUNSELLING PSYCHOLOGY	L	T	P	C
Core			4		-	4
Pre-requisite		Basics in Counselling Psychology	Syllabus Version		2021-22	
Course Objectives:						
The main objectives of this course are to:						
1. Formulate a comprehensive view of the profession of counselling.						
2. Prepare the students for professional counselling.						
3. Apply skills and knowledge of counselling in various settings.						
4. Understand the theories of counselling						
5. Familiarize the evaluation of counselling						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	Identify the attitudes and roles of a professional counsellor, and understand the stages of counselling					K1
2	Develop family and school counselling and formulate vocational Counselling.					K5
3	Understand the structure of Counselling					K2
4	Analyze the methods in individual and group counselling					K5
5	Understand the need for counselling to improve the quality of life					K2
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create						
Unit:1	Origin and Scope of Counseling and Structure of Counseling				12 hours	
Origin and Scope of Counseling Meaning and Definition of Counseling - Meaning of Advice, Direction and Guidance - Aims and Objectives of Counseling - Elements of Counseling - Levels of Counseling - Helping Relationship - Types of Counseling - Directive and Non-Directive methods of Counseling - Peer Counseling.						
Structure of Counseling Preparation for Counseling - Counseling Relationships - The Content and Process of Counseling - Steps in Counseling Process - Counseling Interactions - Factors affecting the Counseling Process - Skills needed for the Counselor - Effective Counselor - Qualities of a Good Counselor - Types of Counselor - Factors of Counseee.						
Unit:2	Early Theories of Counseling and Contemporary Theories of Counseling				12 hours	
Early Theories of Counseling Psychoanalytic Theory - Adlerian Theory - Gestalt Theory - Behaviorstic Theory - Cognitive Behaviorstic Theory - Humanistic and Existential Theories - Transpersonal Theories - Person Centered Theory - Social and Cultural Theories.						
Contemporary Theories of Counseling Reality Theory - Feminine Theory - Transactional Analysis - Eclectic Theory - Post Modern Theory - Multicultural and Integrated Theories.						
Unit:3	Individual Counselling and Group Counselling				12 hours	
Individual Counseling Meaning and Definition of Individual Counseling - Nature of Individual Counseling - Process of Individual Counseling - Benefits of Individual Counseling - Grief Counseling - Counseling for Stressful Life Events.						

Group Counseling Meaning and Definition of Group Counseling - Nature of Group Counseling - The Fields of Group Counseling - Limitations and Assumption of Group Counseling - Value of Group Counseling.		
Unit:4	School Counselling and Vocational Counselling	12 hours
School Counseling Meaning and Definition of School Counseling - Nature of School Counseling - Counseling the Elementary School Students - Counseling the High School Students - Counseling the College Students - Roll of Teacher in Counseling - Duties and Functions of School Counselor - Counseling and School Curriculum.		
Vocational Counseling Meaning and Definition of Vocational Counseling - Nature of Vocational Counseling - Theories of Vocational Counseling - Process of Vocational Counseling - Vocational Counseling and Vocational Guidance - Features of Vocational Counseling and Vocational Guidance - Rehabilitation and Supportive Counseling.		
Unit:5	Counseling in Specific Areas and Reviews in Counselling	12 hours
Counseling in Specific Areas The Nature and Purpose of Family Counseling - Counseling Children and Parents - Marriage Counseling - Premarital Counseling - Marital Enrichment Program - Counseling the Women - Counseling the Weaker Section - Counseling the Drug Addicts - Counseling the Delinquent.		
Reviews of Counseling Nature and Purpose of Counseling Evaluation - Monitoring the Effectiveness of Counseling - Approaches to Evaluation -Problems of Evaluation - Problem of Assessing the Change - Types of Evaluation - Techniques of Evaluation - Usefulness of Counseling Evaluation - Controlling Extraneous Variables.		
Unit:6	Contemporary Issues	2 hours
Expert lectures, online seminars - webinars

Core			4			4
Pre-requisite		Basics in Psychology	Syllabus Version		2021-22	
Course Objectives:						
The main objectives of this course are to:						
1. To enable students to understand the experimental approach in scientific investigation.						
2. To develop the structured report writing skill of the experiments.						
3. To enable students to identify and apply appropriate experimental tests according to the requirements.						
4. To familiarize the students with the procedures in conducting experiments and psychological tests.						
5. To enhance the skills needed for conducting experiments and psychological tests.						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	To become proficient in measuring social dimensions of human behaviour					K5
2	To become proficient in measuring personality tests					K4
3	To become proficient in measuring human resource related tests in organisation settings					K4
4	To become proficient in measuring memory and learning aspects of human behaviour					K5
5	To become proficient in measuring tests related to counselling psychology					K3
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create						
Unit:1 Experiments Related To Advanced Social Psychology 12 hours						
1. Sociometry						
2. Communication Experiment						
3. Leadership Questionnaire						
4. Choice Dilemma Experiment						
5. Prisoner's Dilemma Experiment .						
Unit:2 Experiments Related To Personality Research 12 hours						
1 Eysenck Personality Questionnaire						
2. Cattell's 16 PF						
3. Myers and Briggs Type Indicator						
4.Jungian Functional Types						
5.Thematic Apperception Test						
Unit:3 Experiments Related To Human Resource Management 12 hours						
1. Job Satisfaction Questionnaire						
2. Emotional Intelligence Questionnaire						
3. Job Involvement Scale						
4. Occupational Health and Stress Questionnaire						
5. Personal Value Questionnaire						

Unit:4	Experiments Related To Bio Psychology	12 hours
1. Human Information Processing Survey 2. PGI Memory scale 3. Behaviour Orientation Scale 4. Human Maze Learning 5.Taylor Manifest Anxiety Scale		
Unit:5	Experiments Related To Counselling Psychology	12 hours
1. Multicultural Counseling 2.REBT Counseling 3.Anecdotal Reports 4.Holland Vocational Personality Inventory 5.Recreation and Leisure.		
This list is suggestive - A minimum of 15 experiments/exercises must be completed

Third Semester

Course code	17PSYBC12	PSYCHOPATHOLOGY	L	T	P	C
Core			4			4
Pre-requisite		Basics in Abnormal Psychology	Syllabus Version		2021-22	
Course Objectives:						
The main objectives of this course are to:						
1. To understand the contribution of psychological, biological, and sociocultural factors						
2. To integrate theoretical and empirical research findings in understating mental disorders						
3. To describe the etiology and treatment of psychological disorders						
4. Understand the use of diagnostic tools, including the DSM and ICD						
5. Learn multiple perspectives in evaluating and interpreting mental disorders.						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	Understand the major psychological disorders and be able to identify as per the diagnostic manual					K2
2	To analysis the role of neurobiology, psychological, and social context in the evaluation of mental disorders					K4
3	Apply the contemporary theories and research related to causes and treatments of psychological disorders					K3
4	Apply the principles of diagnosis and treatment to a case study					K3
5	Remember the ethical and legal issues relevant to the provision of mental health services					K1
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create						
Unit:1	Mental Disorder, Classification, Assessment and Organic Mental Disorders				12 hours	
Meaning and Definition of Mental Disorder - Models of Mental Disorders - Introduction to diagnostic classification system and functions: DSM V and ICD 10 - limitation of current classification systems - Theoretical approaches to causes and treatment of psychopathology: Biological, Psychodynamic, Behavioral, Cognitive, Humanistic-Existential, and Social Cultural approaches - Assessment of Psychopathology: Basic element in assessment - Clinical interviews - Clinical observations - Psychological tests - Treatment decision - Organic mental disorders: Delirium, Dementia and Amnesic disorders.						
Unit:2	Disorders of Childhood and Adolescence				12 hours	
Neurodevelopmental Disorders: Autism Spectrum Disorder-Specific Learning Disorders - Intellectual Disability - organic retardation Syndromes.						
Attention-Deficit/Hyperactivity Disorder Disruptive - Impulse-control - Oppositional Defiant Disorder and Conduct Disorder. Anxiety and Depression in Children and Adolescents: Separation Anxiety Disorder - Childhood Depression and Bipolar Disorder.						
Feeding and Eating Disorders of Infancy and Early Childhood - Tic Disorders - Elimination Disorders						
Unit:3	Anxiety, Trauma, Stress -Related and Somatoform Disorders				12 hours	
Generalized Anxiety Disorder -Phobias - Social Anxiety Disorder - Panic Disorder - Obsessive Compulsive Disorder - Acute and Posttraumatic Stress Disorders - Dissociative Disorders:						

Dissociative Fugue- Dissociative Identity Disorder - Dissociative Amnesia- Derealization/ Depersonalization Disorder. Somatoform Disorders: Factitious Disorder - Conversion Disorder- Somatic Symptom Disorder - Illness Anxiety Disorder.		
Unit:4	Disorders of Adult Personality, Gender, and Behaviour	12 hours
Personality Disorders: Odd - Dramatic - Anxious Personality Disorders - Gender Dysphoria - Homosexuality - Paraphilic Disorders: Fetishistic -Transvestic - Exhibitionistic - Voyeuristic - Frotteuristic - Pedophilic - Sexual Masochism - Sexual Sadism Disorder. Eating Disorders: Anorexia Nervosa - Bulimia Nervosa - Binge-Eating Disorder - Sleep Disorders. Substance Use and Addictive Disorders: Alcohol- Depressants - Stimulants - Hallucinogens, Cannabis, and Combinations of Substances –Gambling Disorders		
Unit:5	Mood Disorders, Schizophrenia and Other Psychotic Disorders	12 hours
Depressive Disorder -Major Depressive Disorder - Bipolar Disorders: Bipolar I and II - Theoretical Perspectives - Dysthymic Disorder (Persistent Depressive Disorder) - Cyclothymic Disorders. Schizophrenia- Clinical Features - Positive and Negative Symptoms - Subtypes of Schizophrenia- Other Psychotic Disorder: Schizoaffective Disorder - Schizophreniform Disorder - Delusional Disorder - Brief Psychotic Disorder.		
Unit:6	Contemporary Issues	2 hours
Expert lectures, online seminars - webinars		
	Total Lecture hours	62 hours

Core			4			4
Pre-requisite		Basis in Abnormal Psychology	Syllabus Version		2021-22	
Course Objectives:						
The main objectives of this course are to:						
1. To enable students to understand the classification systems and the rating scales.						
2. To develop the understanding of clinical examination of patients.						
3. To enable students to identify and analyse various signs and symptoms useful for diagnosis.						
4. To familiarize the students with the psychological testing in child cases and personality assessments.						
5. To enhance the skills needed for assessment, case report writing and ethics in clinical psychology.						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	To help students understand the history and current classification systems and the rating scales					K1
2	To develop the interview skills and case history taking.					K3
3	To familiarize various signs and symptoms helpful for diagnosis.					K2
4	To enable students to familiarize with the psychological testing in child psychiatry and self report personality inventories.					K4
5	To enhance the skills in analysing intelligence testing, neuropsychological testing, case report and ethics.					K4
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create						
Unit:1		Classification And Rating Scales			12 hours	
Classification: History - Current Classification Systems. Reliability of Present Psychiatric Classification. Advantages - Disadvantages. ICD-10 - History of Development. Features of ICD-10. Classification of Mental and Behavioral Disorders. DSM-5 - History - Features - Diagnostic Categories.						
Brief Instruments for Treatment Planning, Monitoring and Outcome Assessment: Symptom Checklist-90-R, Brief Symptom Inventory (BSI), The Beck Depression Inventory, State Trait Anxiety Inventory. Psychiatric Rating Scales: Characteristics -Some Rating Scales - Brief Psychiatric Rating Scale, Hamilton Anxiety Rating Scale, Hamilton Rating Scale for Depression, Yale-Brown Obsessive-Compulsive Scale, Scale for Assessment of Negative Symptoms, Scale for Assessment of Positive Symptoms, Social and Occupational Functioning Assessment Scale, Global Assessment of Relational Functioning.						
Unit:2		Clinical Examination Of The Patient			12 hours	
Basics of Interviewing. Rapport, Transference and CounterTransference. Specific Interview Techniques - Types of Questions, Reflection, Facilitation, Silence, Confrontation, Clarification, Interpretation, Summation, Explanation, Transition, Self Revelation, Positive Reinforcement, Reassurance, Advice. Interviewing Psychotic Patients. Factors of Compliance. Burnout. Specific Issues: Fees, Confidentiality, Supervision, Missed Appointment and Length of Sessions, Arrangement of Seating and Office, Notes Taking, Follow-up Interviews. Interviewing Variations - Depressed Patients, Aggressive Patients, Interview of Relatives.						
The Case History: Objective of Case History. Identifying Data, Chief Complaints, History of						

Present Illness, Past Illness, Personal History (Anamnesis) - Prenatal and Perinatal, Early Childhood, Middle Childhood, Late Childhood, Adulthood, Sexual History, Family History, Fantasy and Dreams. Mental Status Examination: General Description, Mood and Affectivity, Speech Characteristics, Perception, Thought Content and Mental Trends, Mini Mental Status Examination (MMSE), Sensorium and Cognition, Impulsivity, Judgment and Insight, Reliability		
Unit:3	Signs and Symptoms	12 hours
Definition of Signs and Symptoms -. Consciousness – Disturbances in Consciousness, Disturbance in Attention, Disturbance in Suggestibility. Emotions – Mood, Affect, Other Emotions, Physiological Disturbances associated with Mood. Disturbances in Motor Behavior (conation). Thinking – General Disturbance in Form or Process of Thinking, Specific Disturbances in Form of Thought, Specific Disturbance in Content of Thought. Speech – Disturbance in Speech, Aphasic Disturbance. Perception – Disturbances of Perception, Disturbances associated with Cognitive Disorder and Medical Conditions, Disturbances associated with Conversion and Dissociative Phenomena. Memory – Disturbance of Memory, Levels of Memory. Intelligence – Information and Vocabulary, Abstraction. Insight – Complete Denial (Grade 1) to True Emotional Insight (Grade 6). Judgment - Critical Judgment, Automatic Judgment, Impaired Judgment.		
Unit:4	Assessment, Examination, Psychological Testing In Child Cases And Personality Assessment	12 hours
Assessment, Examination and Psychological Testing in Child Psychiatry: Clinical Interviews. Structured and Semi Structured Interviews. Rating Scales. Child Psychiatric Evaluation. Mental Status Examination for Children. Neuropsychiatric Assessment. Behavioral Indexes of Brain Damage in Children. Developmental, Psychological and Educational Testing. Self Report Personality Inventories: MMPI – MCMI - CPI. Projective Techniques: Nature of Projective Techniques. Classification of Projective Tests. Thematic Apperception Test – Administration, Scoring and Interpretation. Rorschach – Administration, Scoring, Structural Summary and Interpretation. Evaluation of Projective Techniques.		
Unit:5	Intelligence And Neuropsychological Assessment, Case Report, Ethics In Clinical Psychology	12 hours
Intelligence Testing: Stanford-Binet Intelligence Scale – Wechsler Intelligence Scales. Neuropsychological Testing: Assessment of Reasoning, Concept Formation and Problem Solving, Memory, Orientation, Perceptual and Psychomotor Performance, Language, Attention and Concentration. Neuropsychological Test Batteries: Luria-Nebraska Neuropsychological Test Battery – Halstead Reitan Battery of Neuropsychological Testing. Cognitive Screening Tools and Neuropsychological Tests in India. Case Report: Case History - Report on MSE - Further Diagnostic Studies – Summary of Findings – Diagnosis – Prognosis – Psychodynamic Formulation and Defense Mechanisms – Treatment Plan. Ethics in Clinical Psychology: Utilitarian Theory. Autonomy Theory. Ethical Principles: Justice and Respect, Patient Therapist Sexual Relations, Informed Consent, Surrogate Decision Making, Involuntary Treatment, Confidentiality.		
Unit:6	Contemporary Issues	2 hours

Core			4			4
Pre-requisite		Basics in Abnormal Psychology	Syllabus Version		2021-22	
Course Objectives:						
The main objectives of this course are to:						
1. Demonstrate knowledge in designing psychological interventions.						
2. Understand the applications of psychotherapy						
3. Remember the context of effective treatment						
4. Understand the types of therapies						
5. Prepare the students qualify for professional psychotherapeutic counselling						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	Evaluate counselling and its implication					K6
2	Illustrate the psychodynamic theories involved in counselling					K4
3	Analyze the significance of Existential and Humanistic approaches in counselling					K5
4	Appraise the various techniques in behavioral therapies					K6
5	Understand the contemporary approaches of psychotherapy					K3
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create						
Unit:1	Contexts of Effective Treatment and Overview of Background				12 hours	
Development of Theories of Counseling and Psychotherapy- understanding theories of Counseling and Psychotherapy, Characteristics of Successful clients –Therapeutic Alliance- Guidelines- Clinician skills, Training and Experience- Personal and Professional Characteristics of Effective clinician- -impact of setting on the treatment process- ethical guidelines and standards- role induction- skill development on questioning and interviewing Overviews of background-focused treatment systems - The role of therapist- transference- counter transference- and disclosure						
Unit:2	Classic Psychoanalysis and Post and Neo Freudians				12 hours	
Important theoretical concepts- treatment using psychoanalysis- application and use of Freudian psychoanalysis- evaluation Brief Psychodynamic theory- important theoretical concepts- treatment using Brief Psychodynamic theory(BPT)- Specific Models of BPT- Application and use of BPT-evaluation Individual Psychology- Important theoretical concepts - treatment using individual psychology- application and current use- evaluation- Skill development, Analytical Psychology- Important theoretical concepts - treatment using individual psychology- application and current use- evaluation- Skill development, Ego psychologists- Object relation theorists- Self psychology						
Unit:3	Psychotherapies emphasizing emotions and sensations				12 hours	
Existential Psychotherapy- Important theoretical concepts - treatment using individual psychology- application and current use- evaluation- Skill development, Gestalt Therapy- Important theoretical concepts - treatment using individual psychology- application and current use- evaluation- Skill development Narrative therapy- development- therapeutic alliance- strategies, Solution focused brief therapy- Important theoretical concepts - treatment using individual psychology- application and current use- evaluation, Feminist therapy- development- therapeutic alliance- relational power- strategies						

skill development –Mapping		
Unit:4	Thought focused and Action Focused Therapies	12 hours
The Development of Rational Emotive Behaviour Therapy (REBT)- Important theoretical concepts- format of sessions- treatment- application of REBT- Evaluation. Cognitive Therapy-Development- Important theoretical concepts- Treatment- application and current use-evaluation- Skill development Behavior Therapy and Cognitive Behavioral Therapy Development of Social Learning theory- Treatment- goals- strategies- Interventions- Goal setting Donald Meichenbaum Cognitive behavior modification- Dialectical Behaviour Therapy- Acceptance and Commitment therapy- Mindfulness based cognitive therapy Application- Evaluation- Skill development		
Unit:5	Treatment Approaches	12 hours
Family Therapies- Adlerian Family Therapy- Multigenerational Family Therapy- Structural Family Therapy – Family Therapies that focus on emotions- Family therapies that focus on thoughts and Actions- Post Modern Approaches to Family Therapy- Integrative Models of family Systems Theory- Application of family Therapy- evaluation- skill development Reality Therapy- development- theoretical concepts- treatment- application and current use-evaluation

Core			4			4
Pre-requisite		Basics in Psychology	Syllabus Version		2021-22	
Course Objectives:						
The main objectives of this course are to:						
1. To enable students to understand the nature of Organisation Development.						
2. To help students to understand various theories and models of Organisation Development						
3. To understand OD intervention and team building processes						
4. To enable students to familiarize with training models in Organisation Development.						
5. To develop skills required for training and interventions.						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	To enable the understanding of the various fields in Organisation Development					K1
2	To understand the theories and models of Organisation development and management					K2
3	To familiarize various OD intervention processes and team building processes					K3
4	To enhance the knowledge on comprehensive OD interventions and structural interventions					K4
5	To familiarize with T-group training model in Organisation Development					K4
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create						
Unit:1			The Nature of Organization Development			12 hours
Overview of the Field of Organization Development: Laboratory Training, Survey Research and Feedback, Action Research, Socio-technical and Socio-clinical approaches Values and Assumptions and Beliefs in OD: OD Values and Assumptions, Implications of OD and Assumptions						
Unit:2			Theory and Management of OD			12 hours
Foundations of Organization Development: Models and Theories of Planned Change, Systems Theory, Participation and Empowerment, Teams and Teamwork, Managing the OD Process: Diagnosis, Action Component – OD Interventions						
Unit:3			Team, Intergroup and Third-Party Peacemaking Interventions			12 hours
Overview of OD Interventions: Classifying OD Interventions Team Interventions: Teams and Work Groups, Broad Team-Building Interventions, Process Consultation Interventions						
Unit:4			Comprehensive OD Interventions And Structural Interventions			12 hours
Survey Feedback, Grid Organization Development, Schein Cultural System, Trans-organizational Development Structural Interventions: MBO, Quality Circles, TQM, High Performance Work Systems						
Unit:5			T-Group Training			12 hours

BHARATHIAR UNIVERSITY, COIMBATORE – 641 046
DEPARTMENT OF PSYCHOLOGY

M.Sc., APPLIED PSYCHOLOGY
SEMESTER PATTERN (CBCS)

(For the Students admitted during the Academic year 2021-2022 and onwards)

CORE COURSE – XVII
PSYBC13 – PROJECT WORK
OR

PSYBC13 CLINICAL/INDUSTRIAL PRACTICUM REPORT

(Candidates are required to choose strictly only one these two during the full fourth semester)

MAXIMUM MARKS: 200 (Project Report 150 + Viva Voce 50)

1. The objective of the Project work/ Clinical Practicum is to further their knowledge in Psychology and Psycho-diagnostics under the direct supervision of a Psychologist in Clinical/Organizational setting.
2. A Candidate undertaking Project work/Clinical Practicum should be equipped with the theoretical knowledge in the discipline and practical skills in Psycho-diagnostics including administration and interpretation of cognitive and personality tests involving objective and projective material.
3. During the Project work/Clinical Practicum the candidate may be permitted, under supervision, to participate in the diagnostic testing and to attend clinical/organizational conference where in the cases are diagnosed and treatment/management plan mooted and progress in treatment/training discussed. The candidate may be guided to pursue ten case studies in detail.
4. Besides, the candidates may be required to collect information regarding the following:
 - The history of the organization, the mission statement of the organization, personality sketch of the pioneers in the organization, historical development of the department of Psychology in the organization.
 - The demands and expectations of the role of the Psychologist.
 - The privileges of the Psychiatrist/Mangers/Psychologists in the hospital and Personnel in the Hospital.
 - The functional domain and demarcations of Psychologist Vs Psychiatrists
 - The organizational chart of the Organization and the status of team.
 - The test privileges available at the Hospital/Industry. The test approved for administration in the clinical setting by the team, procedures followed in administering the tests in diagnosis and management and follow up of the use of various test, if any.
 - The therapeutic privileges available at the Hospital/Industry especially, those approved by the clinical team to provide psychotherapies/counseling and group therapies.
 - The details about the hospital routines, mainly about the admission procedures, document maintained, regular clinical/organizational conference, meetings and the follow-up of the cases in detail.

6. The Project work/Clinical Practicum after the completion of the practice,, the report should be submitted to the Department of Psychology, Bharathiar University on or before 30th April of the year in which the candidates did the Practicum,. The Report should adequately reflect the exposure to the training and experience gained by the candidates during the Practicum.

In case a candidate could not submit the report within the date specified he/she may be granted extension of time for three months at one time for submitting their report.

The students can do a **Project Work** under the guidance of a Faculty.

OR

The students can do the **Clinical /Industrial Practicum** in reputed Institutions under the guidance of a Psychologist or HR Personnel

6. Guides for the Project work OR Clinical/Industrial Practicum will be allotted as per the candidates' preference.
7. The candidates are required to maintain a work diary for three months' Clinical/Industrial Practicum. The candidates should submit fortnightly report along with copy of log book endorsed by field supervisor by email. The candidates should mandatorily visit the Department on two pre-decided dates to present their progress to their assigned supervisor. The students are required to report to the concerned guide at the department after completing 70 working days of Clinical/Industrial Practicum by 3rd week of March.
8. Further the candidates are required to maintain attendance at the department after completing the practicum till the date of viva voce examination. The candidates should submit the Clinical/Industrial Practicum Report within 20days (inclusive of holidays) after completion of the clinical/industrial practicum.

8. Submission of Clinical/Industrial Practicum: The norms for evaluation for Clinical Practicum Report/ Industrial Practicum Report are given as below:

1.	Introduction, Objectives, Work carried Out by the candidate	=	30 marks
2.	Case Studies	=	70 marks
3.	Summary and Conclusion	=	20 marks
4.	Attendance	=	30 marks

			150 marks

	Practicum report	=	150 marks
	Viva voce	=	50 marks
	Total	=	200 marks

9. The Objective of the Project Work is mainly to give an exposure to the students on Research Methodology and application of Psychological Principles.

The Project work may be a survey (fact findings or exploratory nature). Construction or Standardization of a test, collection of clinical case studies, a Problem solving assignment, Verification of existing or established theory and any other assignment as approved by the respective faculty guide.

The norms for evaluation for Project Report are given as below:

1.	Introduction	30 marks
2.	Review of Literature	20 marks
3.	Methodology	30 marks
4.	Results and Discussion	50 marks
5.	Summary and Conclusion	10 marks
6.	References	10 marks

150 marks

Project report	=	150 marks
Viva voce	=	50 marks
Total	=	200 marks

Elective Courses

Course code		CYBER PSYCHOLOGY	L	T	P	C
Elective			4			4
Pre-requisite		Basics in Psychology	Syllabus Version	2021-22		
Course Objectives:						
The main objectives of this course are to:						
1. To understand the nature of Cyber Psychology						
2. To describe the nature of the individual in cyberspace						
3. To analyze the nature of relationship in Cyber space						
4. Understand the effect of group dynamics in cyber space						
5. Describe the research methods in cyber psychology						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	To analyze the applications of Cyber Psychology					K5
2	Understanding personality types in Cyber Space					K3
3	To describe transference among people online					K1
4	Understand the social psychology of online groups					K3
5	Remember the ethics in cyber space research					K1
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create						
Unit:1						
The Nature of Cyber Psychology			12 hours			
Cyber-Psychology – Definition – Human Computer Interface – Cyberspace as a Psychological Space – Psychology in Cyberspace - Basic Psychological Features of Cyberspace - Networks as Mind and Self – Model of Cyber Psychology - The Online Disinhibition Effect.						
Psychology of Avatars and Graphical Space - Two Paths of Virtual Reality - The Facts of Dreaming in Cyberspace - Black Hole of Cyberspace - Online Lingo - Internet Demographics - Cyberspace Humor - Coping with Spam.						
Unit:2						
The Nature of Individual in Cyberspace			12 hours			
Identity Management in Cyberspace - Personality types in Cyberspace - Unique Roles in Cyberspace - Transference to Computers and Cyberspace - Addiction to Computers and Cyberspace - Regressive behavior in Cyberspace - Online Gender - Switching - Adolescents in Cyberspace.						
Wizards: The Heart of an Online Community - On being a "god" - Y2K and Apocalyptic Thinking - Integrating Online and Offline Living - An Online Psycho - Educational Program.						
Unit:3						
The Nature of Relationships in Cyberspace			12 hours			
In-person versus Cyberspace Relationships - Transient and Long Term Online Relationships -The psychology of Text Relationships - Hypotheses about Online Text Relationships - E-mail Communication and Relationships – Transference among People Online.						
How to Resolve Conflict Online – Cyberspace Romances – Subtlety in Multimedia Chat - Media: Games, Entertainment, and Education - The Future: The Ultimate Human-Computer Interface.						
Unit:4						
The Nature of Group Dynamics in Cyberspace			12 hours			
Social psychology of Online Groups - Developmental stages of Mailing Lists - Making Virtual Communities work - Unique Groups in Cyberspace - Decision Making Methods for E-mail						

Groups - Changes in Group Boundaries and Dynamics. Group Games using Avatars-Geezer Brigade: Studying an Online Group- Managing Deviant Behavior in Online Groups – Online Photo-Sharing Communities - Establishing a Cyberpsychological Niche and Equilibrium.		
Unit:5	The Nature of Flow Experience and Research Methods in Cyber psychology	12 hours
Flow as a Psychological Construct – Flow in Empirical Research – Studies related to Cyberspace – Flow in Diverse Cyberspace related Activities – Optimal Expedience and Psychological Addiction – Cross cultural studies Publishing online - Case studies of digital life forms - One of Us: Participant observation research - Steps in studying an online group - Ethics in cyberspace research - Studying full cyberspace immersion.		
Unit:6	Contemporary Issues	2 hours
Expert lectures, online seminars - webinars		
	Total Lecture hours	62 hours
Text Book(s)

Course code	17PSYBEG01	SPORTS PSYCHOLOGY	L	T	P	C
Elective			4			4
Pre-requisite		Basis in Psychology	Syllabus Version		2021-22	
Course Objectives:						
The main objectives of this course are to:						
1. To understand the theoretical foundation and the effectiveness of psychologist role with clients in sports, exercises and performance psychology.						
2. Understanding Athletic behaviors						
3. To describe the relation with cognitive psychology and sports psychology						
4. To describe the social psychology of sports						
5. Understanding to apply sports psychological phenomenon						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	Understand the theoretical foundation of the mental processes that influence human performance in athletic settings.					K2
2	Develop and apply health, physical activity, and psychological principles in the sports					K3
3	Evaluate the effectiveness of cognitive psychology in sports					K5
4	Identify and apply psychological techniques to enhance the performance in sports					K4
5	Evaluate the needs of athletes and plan psychotherapies based on this evaluation.					K5
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 – Create						
Unit:1	Mental Side of Sport				12 hours	
The Mental Side of Sport: Introduction to Sports Psychology- Factors influencing the mental demands of a given sport- sports and exercise psychology as an academic discipline- history of sport and exercise psychology- Research methods in sports and exercise psychology- what do sport Psychologist do.						
Unit:2	Exploring Athletic Behaviour: Key Concepts				12 hours	
Exploring Athletic behavior- Key concepts: Motivation and Goal setting- anxiety in Sport Performance- Concentration in Sports Performance- Self- Confidence- Peak Performance and Expertise.						
Unit:3	Cognitive Psychology and Sports				12 hours	
Cognitive Psychology and Sport- Cognitive Style and Sport- Attention Style and performance- Imagery and Sport Performance- Attribution of self and others- Arousal, Stress and Anxiety. Theories: Implicit Theories- Self- Determination Theory- Expectancy Value- Motivational Theory- Goal Theory- Attributions Theory.						
Unit:4	Sports in Context: Social Psychology of Sports				12 hours	
	Sport in Context: The social psychology of sports: Social Facilitation – Social loafing – Team Dynamics – Group Process – Casual Attribution in Sports – Violence and Aggression in Sports.					

Unit:5	Applying Sport Psychological Phenomena	12 hours
Applying Sport Psychological Phenomena: Mental Skill Training- Self Talk- Mental Imagery- Relaxation Training- Calming the Physiology- Performance- inhibition due to personality-factors- Burn out and injuries – Substance Abuse- Aggression- Character Development- Youth Sport.		
Unit:6	Contemporary Issues	2 hours
Expert lectures, online seminars – webinars		
	Total Lecture hours	62 hours

Course code		INTEGRAL PSYCHOLOGY	L	T	P	C
Elective			4			4
Pre-requisite		Basis In Psychology	Syllabus Version		2021-2022	
Course Objectives:						
The main objectives of this course are to:						
1. To understand consciousness and reality						
2. To describe outer being and outer mind						
3. To describe Purusha and Prakriti						
4. Understanding techniques controlling disturbance of mind						
5. Remember techniques for growth and mastery						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	List out the levels of consciousness					K1
2	Understand the inner being and subminimal self					K3
3	Discover the psychology of faith					K3
4	Remember techniques to control anger, feelings of inferiority					K1
5	Apply dynamic meditation and self-observation for growth					K4
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create						
Unit:1						
Consciousness the Reality			12 hours			
Consciousness the reality. The Manifold Being. The Surface Being and the Inner Being. Levels of Consciousness: Conscience, Subconscient, Superconscient. Gradations of higher consciousness.						
Unit:2						
Outer Being and Outer Mind			12 hours			
Outer Being: Outer Mind, Outer Vital Being and Outer Physical Being. Inner Being; the Subliminal Self. The Psychic Being & psychic entity. Psychical phenomena						
Unit:3						
Purusha and Prakriti			12 hours			
Purusha and Prakriti: Soul and Nature - The Gunas of Prakriti: The three modes of Nature - Self, Ego and Individuality - Liberation and transformation. The Psychology of Faith.						
Unit:4						
Techniques to Control Disturbance of Mind, Vital and Physical			12 hours			
Dealing with disturbance of Mind (Anxiety, obsessions and compulsions), disturbance of Vital (Boredom, Lack of energy, Depression, Anger, Feelings of inferiority, Sensitiveness) and disturbance of physical consciousness: Will, discipline and endurance, Faith and suggestion.						
Unit:5						
Techniques for Growth and Mastery			12 hours			
Stepping back - Becoming aware of 'oneself' – Self-observation – Visualization – Mastery through attitude – Identification – Using life as a mirror – Widening of consciousness – Dynamic meditation – Exercising static power – Awakening inner consciousness – Drawing upon helpful forces.						

Unit:6	Contemporary Issues	2 hours
Expert lectures, online seminars - webinars		
	Total Lecture hours	62 hours

Course code	17PSYBGE02	POSITIVE PSYCHOLOGY	L	T	P	C
Elective			4			4
Pre-requisite		Basics in Psychology	Syllabus Version		2021-22	
Course Objectives:						
The main objectives of this course are to:						
1. Outline the nature and importance of Positive Psychology						
2. Understand the perspectives of Positive Psychology						
3. Recognize the importance of Prosocial behavior						
4. Understand the importance of positive cognitive states and processes						
5. Enhance personal growth and development						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	Identify positive emotions that affects happiness in everyday life					K1
2	Predict Positive Traits, Motives and Self –efficacy					K2
3	Identify and classify Hope, flow, wisdom and courage					K1
4	Recognize and appraise the neurobiology of Optimism and Emotional Intelligence					K1
5	Understand the nature of good work and gainful employment					K2
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create						
Unit:1						
The Nature and Assessment of Positive Psychology			12 hours			
Definition of Positive Psychology. Western Perspectives on Positive Psychology. Eastern Perspectives on Positive Psychology. Classifications and Measures of Human Strengths and Positive Outcomes.						
Unit:2						
Positive Emotional States and Process			12 hours			
The Principles of Pleasure: Understanding Positive Affect, Positive Emotions, Happiness, and Well-Being.						
Making the Most of Emotional Experience: Emotional-Focused Coping, Emotional Intelligence, Socioemotional Selectivity, and Emotional Storytelling.						
Unit:3						
Positive Cognitive States and Processes			12 hours			
Seeing Future through Self-Efficacy – Optimism and Hope. Two Universal Virtues – Wisdom and Courage.						
In Search of Optimal Experiences- Mindfulness, Flow, and Spirituality.						
Unit:4						
Prosocial Behaviour and Changing Human Behavior			12 hours			
Empathy and Egotism-Portals to Altruism, Gratitude, and Forgiveness. Attachment, Love, and Flourishing Relationships.						
Changing Human Behavior: Balanced conceptualizations of Mental Health and Behavior.						
Interceding to prevent the Bad and Enhance the Good.						

Unit:5	Positive Environment and Positive Psychology in Contexts	12 hours
Positive Schooling. Good Work – The Psychology of Gainful Employment. The Me/We Balance – Building Better Communities. Positive Psychology in Context – Developing Strengths and Living Well in a Cultural Context, Living well at Every Stage of Life		
Unit:6	Contemporary Issues	2 hours
Expert lectures, online seminars - webinars

Course code	17PSYBGE03	CONSUMER BEHAVIOR	L	T	P	C
Elective			4		-	4
Pre-requisite	Basics in Marketing Psychology	Syllabus Version	2021-22			
Course Objectives:						
The main objectives of this course are to:						
1. Understand the applications of Consumer Behavior						
2. Familiarize the concepts of marketing segmentation and consumer diversity						
3. Discuss the principal factors that influence consumers as individuals and decision makers with an application to the buying decision process.						
4. Understand the impact of marketing on consumer behavior						
5. Demonstrate methods to improve customer satisfaction						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	Identify factors that influence consumer behavior					K1
2	Describe the target market and determine the positioning strategy according to consumer characteristics and behaviour					K1
3	Understand the essence of how consumers make decisions and be able to assess the relevant implications for marketing practitioners.					K2
4	Analyze how involvement influences consumer purchases					K4
5	Analyze the major stages which consumers usually go through when making a consumption					K4
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create						
Unit:1	Consumer Behavior, Motivation and Personality				12 hours	
Consumer Behaviour: Nature and scope of Consumer Behaviour, Consumer Research and Marketing Segmentation						
Consumer Motivation: Motivation as Psychological Force, Types and Theories of Motivation, Measurement of Motives						
Personality and Consumer Behaviour: Theories of Personality, Personality and Understanding Consumer Diversity, Brand Personality, Self- and Self-Image						
Unit:2	Perception, Learning and Attitudes				12 hours	
Consumer Perception: Elements of Perception, Dynamics of Perception, Consumer Imagery						
Consumer Learning: Elements of Consumer Learning, Behavioral Learning Theories, Cognitive Learning Theory, Measures of Consumer Learning						
Consumer Attitude Formation and Change: Meaning of Attitudes, Structural Models of Attitudes, Attitude Formation, Strategies of Attitude Change						
Unit:3	Communication Process and Group Influences				12 hours	
Communication and Consumer Behaviour: Components of Communication, Communication Process, Designing Persuasive Communication, Marketing Communication and Ethics						
Reference Groups and Family Influence: Understanding the Power of Reference Groups, Consumer Related Reference Groups, Celebrity and other Reference Groups, Family Concept, Socialization of Family Members, Function of Family, Family Life Cycle						

Unit:4	Leadership and Diffusion of Innovation Process	12 hours
Consumer Influence and the Diffusion of Innovations: Opinion Leadership, Opinion Leadership Process, Measurement of Opinion Leadership, Interpersonal Flow of Communication Diffusion of Innovation: Diffusion Process, Adoption Process, Profile of Consumer Innovator		
Unit:5	Consumer Decision Making Process	12 hours
Decision Making Process, Levels of Consumer Decision Making Process, Models of Consumers, Four views of Consumer Decision Making, Model of Consumer Decision Making		
Unit:6	Contemporary Issues	2 hours
Expert lectures, online seminars - webinars		
	Total Lecture hours	62 hours

Course code		EDUCATIONAL PSYCHOLOGY	L	T	P	C
Elective			4			4
Pre-requisite		Basics in Psychology	Syllabus Version		2021-22	
Course Objectives:						
The main objectives of this course are to: 1. Understand the importance of Educational Psychology 2. To describe the research methods in Educational Psychology 3. To understand the theories of cognitive development 4. Explain the concepts of language and intelligence 5. To understand special education						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	Describe the origin and nature of mental health care in the welfare system					K1
2	Analyze the Psychological conceptions of the environment					K4
3	Apply Community-based health promotion methods					K3
4	Understand diagnosis, prescribing and implementing					K2
5	Discover the Choices in Evaluation and participatory evaluation as an integrated process					K3
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create						
Unit:1		Exploring Educational Psychology			12 hours	
Exploring Educational Psychology: Historical Background- Teaching: Art and Science-Effective Teaching: Professional knowledge and Skills-Goal Setting and Instructional planning Skills-Classroom Management Skills-Motivational Skills-Technological Skills. Research in Educational Psychology: The Scientific Research Approach – Research Methods-Programme Evaluation Research-Research Challenges.						
Unit:2		Cognitive Development: Piaget's theory and Vygotsky's Theory			12 hours	
Cognitive Development: Piaget's theory: Cognitive Processes-Piagetian Stages-Evaluating Piaget's Theory: Contributions and Criticisms. Vygotsky's Theory-Assumptions- Zone of Proximal Development-Scaffolding- Language and Thought. The Brain: Development of neuron and Brain Region- Development of Brain in Childhood and Adolescents						
Unit:3		Language Developments and Intelligence			12 hours	
Language Development: Language-Morphology-Syntax- Semantics-How Language Develops-Biological and Environmental Influence. Memory: Encoding-Storage-Retrieval and Forgetting. Intelligence: Intelligence Tests- Theories of Multiple Intelligence-Information- Processing Approach –Segler' View – Metacognition – Good Information Processing Model						

Unit:4	Learning and Motivation	12 hours
Learning: Behavioral Approach to Learning-Classical Conditioning- Operant Conditioning. Increasing Desirable Behaviors- Decreasing Undesirable Behavior. Bandura's Social Cognitive Theory- Observational Learning.		
Motivation: Perspectives on Motivation- Extrinsic and Intrinsic Motivation- Pother cognitive Process- Anxiety and Achievement-Social Motives.		
Teaching Techniques: Description-Demonstration- Lecture Method- Discussion Method- Dramatization- Explanation- Aptitude Treatment Interaction –Mastery Learning –Teaching through Multimedia		
Unit:5	Special Education	12 hours
Hard-to-reach, Low Achieving Students: Discouraged Students- Uninterested and Alienated Students- Dealing with Problem Behaviors: Management Strategies- Dealing with Aggression – Classroom and School Based Programs.		
Children With Disabilities: Sensory Disorders- Physical disorders-Mental Retardation-Speech and Language Disorders- Learning Disabilities- Attention Deficit Hyperactivity Disorder- Emotional and Behavioral Disorders.		
Slow Learners- Autism Spectrum Disorders. Children Who Are Gifted: Characteristics, Life Course of the Gifted- Educating Gifted Child		
Unit:6	Contemporary Issues	2 hours

Course code	APPLIED STATISTICS AND PSYCHOLOGICAL TEST CONSTRUCTION		L	T	P	C
Elective			4			4
Pre-requisite	Basics in Psychological Statistics		Syllabus Version		2021-22	
Course Objectives:						
The main objectives of this course are to:						
1. Understand Central tendency, Variability, Correlation and Regression						
2. Learn to calculate Student t Test, ANOVA (one way, two-way), Non-parametric statistics						
3. Nature of test construction						
4. Describe realbility and validity						
5. Understand Norms and Test Scales, and Response Set in Test Scores						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	Recognize the nature and applications of applied statistics					K1
2	Understand the computation of non-parametric statistics					K2
3	Remember the steps in test construction					K1
4	Describe the standard error of measurement and index of realbility					K1
5	Illustrate the Meaning of Norm-Referencing and Criterion-Referencing. and steps in developing norms					K3
K1 - Remember; K2 - Undestand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create						
Unit:1	Central tendency, Variability, Correlation and Regression				12 hours	
Nature and Scope of Applied Statistics. Basic concepts – Random Samples, Variables and Constant.Measures of Central Tendency – Mode, Median, Arithmetic Mean, Effects of Score Transformation. Variability – Range, Semi-Interquartile Range, Variance and Standard Deviation. Score Transformation and Effects of Variability. Comparing means of two distributions. Correlational Analysis – Matter of Direction, Matter of Degree. Meaning of Correlation. Methods.						
Unit:2	Student t Test, ANOVA (one way, two-way), Non-parametric statistics				12 hours	
One tail test, two tail test. Student ‘t’ – Application and Purpose, Assumptions, Calculation, Interpretation. Large sample t test. Test of Significance of difference in proportions. ANOVA – Application and Purpose, Assumptions, Calculation of One-way ANOVA and Two-way ANOVA. Interpreting interaction in Two-way ANOVA. Honestly Significant Difference. Non-parametric tests – Assumptions. Chi-Square. Mann Whitney U Test. Kruskal-Wallis one-way analysis of variance by ranks. Wilcoxon test. Comparison of Parametric and Non-parametric test						
Unit:3	Test Construction (Introduction, Item Writing and Item Analysis)				12 hours	
Test Construction: Meaning of Test in Psychology. Classification of Test. Characteristics of a Good Test. General Steps in Test Construction.						
Item Writing: Meaning and Types of Items. Essay type and Objective type tests. General guidelines for Item Writing. General Method for scoring Objective Tests.Meaning and Purpose. Power Tests. Item Difficulty. Optimal Difficulty Value for a Reliable Test. Index of Discrimination. Item Response Theory. Distractor Analysis. Speed Tests. Factors affecting the						

Index of Difficulty and the Index of Discrimination. Power of Item Analysis. The Item Characteristics Curve.		
Unit:4	Reliability and Validity	12 hours
Reliability – Meaning. Methods. Satisfactory size for reliability. Standard Error of Measurement. Factors influencing Reliability of Test Scores. Improving reliability of test scores. Estimation of True Scores. Index of reliability. Validity- Meaning. Types. Convergent Validation and Divergent Validation. Statistical Methods for calculating validity. Factors influencing validity. Relation between reliability and validity		
Unit:5	Norms and Test Scales, and Response Set in Test Scores	12 hours
Norms and Test Scales – Meaning of Norm-Referencing and Criterion-Referencing. Steps in Developing Norms. Types of Norms and Test Scales – Age Equivalent Norms, Grade – Equivalent Norms, Percentile Norms, Standard Score Norms. Response Set – Meaning. Types of Response Set. Implications of Response Set. Methods to eliminate Response Sets.		
Unit:6	Contemporary Issues	2 hours
Expert lectures, online seminars - webinars		
	Total Lecture hours	62 hours

Course code	COMMUNITY PSYCHOLOGY		L	T	P	C
Elective			4			4
Pre-requisite		Basis in Psychology	Syllabus Version		2021-22	
Course Objectives:						
The main objectives of this course are to:						
1. To understand the influence and current issues in community mental health						
2. Describe the project-based research model						
3. Explain the basic concepts in prevention						
4. Describe the Impetus for diagnosis						
5. Understand the ethics in community intervention						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	Describe the origin and nature of mental health care in the welfare system					K1
2	Analyze the Psychological conceptions of the environment					K4
3	Apply Community-based health promotion methods					K3
4	Understand diagnosis, prescribing and implementing					K2
5	Discover the Choices in Evaluation and participatory evaluation as an integrated process					K3
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create						
Unit:1		Community Psychology			12 hours	
Origin of Mental Health care in the welfare system, Community Mental health, Influence of Applied Social Psychology and the War on Poverty, Current issues in Community Mental Health, Interdisciplinary Community Psychology						
Psychological conceptions of the environment - Social environmental influences on behavior, Perceived social climates, Social roles, Social capital, Socio-Physical Environment						
Unit:2		Approach to research Participatory action approaches to research.			12 hours	
Community development context of research: What is Community Development – Research and Community Development – Building Research relationships in a community development context Project-based research model: Diagnose, Prescribe, Implement, Evaluate – Participatory flexibility, Where are you in project cycle.						
Unit:3		Prevention			12 hours	
Basic concepts in prevention, Secondary prevention, Primary mental health project, Limitations of Secondary prevention in mental health, Universal and primary prevention. Prevention through stepwise risk reduction, School as a locus of prevention, Community-based health promotion, Self-help group: Growth of Self-Help Groups, Types of Self-Help Groups, The Nature of Self-Help Groups, Dynamics of Self-Help Groups, Self-Help and the Model of a Family, How Self-Help Groups Work, Starting Self-Help Groups						
Unit:4		Diagnosing			12 hours	
Impetus for diagnosis, Structure for a Diagnostic Process – The core group, Problems,						

Opportunities, and Issues, Needs Assessment, Asset Mapping, Needs and Resources Prescribing: A planning approach, Program prescriptions. Implementing: Research as Action, Community Research, Target Research		
Unit:5	Evaluation	12 hours
Choices in Evaluation, Participatory evaluation from the beginning, participatory evaluation as an integrated process Beyond Information: Art of Paying attention, Role Models for Research as a Daily Practice, Information management and information technology Writing proposals, Ethics in Community Intervention		
Unit:6	Contemporary Issues	2 hours
Expert lectures, online seminars - webinars		
	Total Lecture hours	62 hours

Supportive Course

Course code		PROBABILISTIC ORIENTATION FOR PERSONALITY DEVELOPMENT	L	T	P	C
Supportive			27	3	-	2
Pre-requisite		Basis in Psychology	Syllabus Version		2021 - 2022	
Course Objectives:						
The main objectives of this course are to:						
1. To understand the Psychological Foundation of Human Being						
2. Describe the Basic premise of Probabilistic Orientation						
3. Explain Insight into Bias, Healthy Skepticism.						
4. Describe Unconditional Acceptance and Appreciation of chance						
5. Understand Intervention Studies on adolescents and young adults						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	List the construct of Probabilistic Orientation					K1
2	Describe the assessment of Probabilistic orientation					K1
3	Analyze the applications of Probabilistic orientation					K5
4	Outline the Seven Factors of Probabilistic Orientation					K4
5	Illustrate the Effect of Probabilistic Orientation Broadcast Intervention					K3
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 – Create						
Unit:1		Psychological Foundation of Human Being			05 hours	
Psychological Foundation of Human Being: Thinking, Motivation, and Personality. Interrelation between thinking, motivation and personality. Personal Construct Psychology. The construct of Probabilistic Orientation (PO)						
Unit:2		Basic premise of Probabilistic Orientation			05 hours	
Basic premise of Probabilistic Orientation – Origin of universe - Big Bang Theory and Evolution of Nature - Seven Factors of Probabilistic Orientation – Assessing Probabilistic Orientation.						
Unit:3		PO Exercises I			05 hours	
Unbounded Expectancy, Sensing Unlimited Possibilities, Insight into Bias, Healthy Skepticism.						
Unit:4		PO Exercises II			05 hours	
Unconditional Acceptance, Appreciation of chance and Awareness of Predictability.						
Unit:5		Research studies on PO			05 hours	
Intervention Studies on adolescents and young adults –Effect of Probabilistic Orientation Broadcast Intervention- Study on efficacy of PO therapy.						
Unit:6		Contemporary Issues			2 hours	
Expert lectures, online seminars – webinars						
A MINIMUM OF 2 PRACTICAL NEEDS TO BE DONE BY THE CANDIDATE AND THE						

RECORD OF WORK HAS TO BE SUBMITTED BASED ON THE ABOVE SYLLABUS		
	Total Lecture hours	27 hours

Course code	GS05	TRANSACTIONAL ANALYSIS	L	T	P	C
Supportive			27	3		2
Pre-requisite		Basis in Psychology	Syllabus Version		2021 - 2022	
Course Objectives:						
The main objectives of this course are to:						
1. To teach students with an in-depth understanding of application of Transactional Analysis in health profession.						
2. Understand the key concepts of transactional analysis						
3. Describe the meaning of Game analysis						
4. Understand the techniques of script analysis						
5. Help students understand the analysis of relationships						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	Understand and solve relationship problems of clients					K2
2	Gain an insight into type of personalities					K1
3	Analyze the reason which creates people tick					K4
4	Apply the therapy to improve relationship					K3
5	Re-evaluate the personal goals and life goals of clients					K5
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 – Create						
Unit:1						
Transactional Analysis Key Concepts			05 hours			
What is Transactional Analysis- Analysis of Ego states- What makes Transactional Analysis to be T.A.?						
Unit:2						
Transactional Analysis Proper			05 hours			
Transactional Analysis Proper: The Analysis of Transactions- The Analysis of Strokes- The Contents of Communication.						
Unit:3						
Game Analysis			05 hours			
Games Analysis - Games that are played						
Unit:4						
Script Analysis			05 hours			
Script Analysis - - Life Management and History of the Person						
Unit:5						
The Analysis of Relationships			05 hours			
The Analysis of Relationships - Person to person- Analysis of Organizations- Person to Person In-Group.						
Unit:6						
Contemporary Issues			2 hours			
Expert lectures, online seminars – webinars						
A MINIMUM OF 2 PRACTICAL NEEDS TO BE DONE BY THE CANDIDATE AND THE RECORD OF WORK HAS TO BE SUBMITTED BASED ON THE ABOVE SYLLABUS

Course code	GS30	INTRODUCTION TO PSYCHOLOGY	L	T	P	C
Supportive			27	3		2
Pre-requisite		Basis in Psychology	Syllabus Version		2021-22	
Course Objectives:						
The main objectives of this course are to:						
1. To understand the nature of Psychology						
2. Learn the role of the nervous system, endocrine systems and consciousness						
3. Understand the basic anatomy and functions of sensation and perception						
4. Describe the cognition and problem-solving strategies						
5. Know the fundamental principles and features of personality and motivation						
Expected Course Outcomes:						
On the successful completion of the course, student will be able to:						
1	To understand different models of human behavior based on science					K2
2	To analysis major components of biological systems studied in psychology					K4
3	Evaluate the methods to improve memory and problem solving					K5
4	Design, conduct, or evaluate basic psychological techniques to improve personality					K6
5	Apply psychological principles to everyday life					K3
K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create						
Unit:1		The Nature and Scope of Psychology			5 hours	
The Nature and scope of Psychology- Consciousness and Behavior- Methods and Fields						
Unit:2		Biological Bases of Human Behaviour			5 hours	
Biological Bases of Human Behaviour - Heredity and Environment- The role of sensory processes and Human Behavior						
Unit:3		Attention, Perception and Learning			5 hours	
Attention, Perception and Learning - Selective Attention- Sorting out the World- Division of Attention- Perception: Visual, form and Movement- Learning Principles- Memory and Forgetting.						
Unit:4		Intelligence and Creativity			5 hours	
Intelligence and Creativity - Intelligence- IQ- Measuring Intelligence- Mental Retardation- Gifted- Creativity- Problem Solving						
Unit:5		Personality and Motivation			5 hours	
Personality and Motivation - Theories of Personality- Assessment and its Development- Human Motivation- Needs- Understanding Emotions						
Unit:6		Contemporary Issues			2 hours	
Expert lectures, online seminars - webinars						
			Total Lecture hours		27 hours

Value Added Course

VALUE ADDED COURSE

LIFE SPAN PSYCHOLOGY		
Name of the Department		Psychology
Name of the Faculty Member i/c With Complete Address with Phone and e-mail		
Inter / Intra Department Course		Intra Department Course
Duration of the Course		
Eligibility		
Number of Candidates to be Admitted		
Registration Procedure		
Job Opportunities:		
This course helps in understanding behavior from birth to end of life. The stages of development are important and by studying them one can predict behavior better. It has implications in counselling field.		
The objectives of the Course are:		
The main objectives of this course are to:		
1	Understand the stages of development	
2	Remember the behavior patterns in developmental stages	
3	Outline the hazards of development in each stage	
4	Understand the need for developmental tasks	
5	Understand the theories of development	
Course Content		Lecture / Practical / Project / Internship
Module 1	Introduction- Issues in studying Life Span Psychology- Introduction to Prenatal Development	1 hour 50mts
Module 2	Characteristics- Developmental Tasks- Environmental influences- Hazards of Prenatal Environment	1 hour 50mts
Module 3	Infancy and Toddlerhood- Characteristics- Piaget's Development theory- Developmental tasks	1 hour 50mts
Module 4	Erikson's theory of Infant and Toddler Personality- Hazards of Infancy and Toddlerhood	1 hour 50mts
Module 5	Early childhood and late childhood – Characteristics- Developmental tasks of early childhood	1 hour 50mts
Module 6	Body and brain growth- Motor Development- Vygotsky's sociocultural theory- language development- hazards of early childhood	1 hour 50mts
Module 7	Puberty- Characteristics- Developmental Tasks- Hazards of Puberty	1 hour 50mts
Module 8	Introduction to Adolescence- Characteristics- Developmental tasks- Eriksson theory: Identity VS identity confusion. Hazards	1 hour 50mts
Module 9	Adulthood- Characteristics- Developmental Tasks- Family cycle	1 hour 50mts
Module 10	Career development- Life expectancy- Retirement and leisure- Hazards	1 hour 50mts

BEHAVIOR MODIFICATION		
Name of the Department	Psychology	
Name of the Faculty Member i/c With Complete Address with Phone and e-mail		
Inter / Intra Department Course	Intra Department Course	
Duration of the Course		
Eligibility		
Number of Candidates to be Admitted		
Registration Procedure		
Job Opportunities:		
This paper deals with interventions for behavior change. It has job openings for clinical psychologist who by using these therapies can bring about behavior modification.		
The objectives of the Course are:		
The main objectives of this course are to:		
1	Understand the nature and historical perspectives of behavior modification	
2	Describe the areas of applications of behavior modification	
3	State the principles of reinforcement	
4	Understand the techniques of behavior modification	
5	Describe the techniques of chronic illness interventions	
Course Content	Lecture / Practical / Project / Internship	
Module 1	Introduction to Behavior Modification- Meaning - Characteristics- Historical Perspectives of Behavior modification	1 hour 50mts
Module 2	Areas of Application Community- Business – Industry - Self management	1 hour 50mts
Module 3	Reinforcement- Principles- Factors influencing effectiveness of reinforcement	1 hour 50mts
Module 4	Extinction- Punishment- Discrimination and Generalization- Shaping and modeling	1 hour 50mts
Module 5	Systematic Desensitization process- applications- JPMR applications	1 hour 50mts
Module 6	Aversive Techniques- REBT- Token Economy	1 hour 50mts
Module 7	Management of Anxiety and Stress- Obesity management techniques	1 hour 50mts
Module 8	Phobia- Cognitive behavior modification	1 hour 50mts
Module 9	Cognitive Restructuring- Life style management	1 hour 50mts
Module 10	Chronic illness interventions- risk factor modification	1 hour 50mts
